■ Circumcision Devices (Simple Packing)

Medical Equipment Registration Number:

Lu Machinery Registration Approval 20172660238

■ Product Features:

The whole operation is simple, safe and painless. The operation only lasts 3-5 minutes, with no surgery and suture free, the patients can get rapid recovery, and does not affect the work and life after operation;

The redundant prepuce and phimosis will easily fall off without scar and get reshaped and beautified;

The "circumcision ring" promotes penis to erect frequently and constantly expand at night, in which the cell and tissue of penis is activated, resulting in secondary growth;

After circumcision, epidermal keratinization of glans is caused, which helps desensitization, thus enhancing the sexual function;

It can prevent male urethritis, inflammation of glans and canceration; and meanwhile avoid cross-infection and gynecological diseases;

The circumcision ring can reduce more than 60% infection chance of HIV, playing a certain role in preventing the spread of HIV. The circumcision ring, with advanced technologies and outstanding advantages, can help male friends of all ages to "cut away" their secret sorrow.

■ Application

Phimosis and redundant prepuce

■ Contraindication:

Acute urinary tract infection; concealed penis; redundant patient with short tie; nervous system disease or mental system disease; leukemia and patient with history of haemorrhagic disease; hypertension, cardiac; STD patient; diabetic.
